

Please read before using your new Li-Po Bag.

IMPORTANT USE AND SAFETY INSTRUCTIONS.

Thank you for purchasing the Li-Po bag. Please read these instructions before using. The use of a Li-Po Bag does not guarantee total protection of surrounding surfaces. It is simply intended to alleviate the effects of a battery failure during charging or after a crash.

Battery safety:

Lithium Polymer batteries can be extremely volatile. Failure to adhere to established charging guidelines may result in fire, personal injury and damage to property if used incorrectly.

The makers, distributors or retailers of this LI-Po bag assume no liability if the fails to comply with all safety guidelines.

By purchasing this product, the buyer assumes all risks associated with its intended use. If you cannot comply with these guidelines please return this product unused to you point of purchase. When charging batteries ensure you choose a safe, well ventilated area-way from flammable materials. Always charge on a non-flammable surface.

Li-Po Bag use Instructions:

- 1) Ensure that charger rate is properly set and polarity is correct.
- 2) Attach charging leads to battery.
- 3) Place battery in Place Li-Po bag towards the bottom.
- 4) Place Li-Po bag on non-flammable surface.
- 5) Place the charge leads through the provided space (left or right seam) at the top of the bag.
- 6) Close top flap of Li-Po Bag and close ensuring the Velcro is secure.
- 7) Charge battery using proper charging practices.

Avoid damage to the Place Li-Po Bag. Replace if it becomes ripped, worn or is involved in a battery failure.
